Environment & Health

***Presented
By:***

Rupesh Nirmalkar
Course - BCA (CTIS)
semester - 4th

***Guided By:
Mrs. Anamika Mahapatra***

| The Critical Link

- ✿ **EnvironmentalHealth:** How external factors affect human wellbeing.
- ✿ **Vital Connection:** Clean ecosystems are the foundation of human survival.
- ✿ **Economic Burden:** Poor environment leads to high healthcare costs.
- ✿ **WHO Fact:** ~24% of global deaths are linked to environmental risks.

| Air Pollution & Health

- ✿ **ParticulateMatter(PM2.5):**Enters bloodstreams through lungs.
- ✿ **Acute Effects:** Asthma, Bronchitis, and irritation of eyes/throat.
- ✿ **Chronic Effects:** Lung cancer and cardiovascular diseases.
- ✿ **Sources:** Industrial smoke, vehicle exhaust, and crop burning.

| Water & Sanitation

- ✿ **Water-Borne Diseases:** Cholera, Typhoid, and Dysentery.
- ✿ **Chemical Contamination:** Arsenic and Lead poisoning in groundwater.
- ✿ **SDG 6:** Ensuring clean water and sanitation for all by 2030.
- ✿ **Plastic Crisis:** Microplastics entering human food chains.

| Climate Change Impacts

- ✿ **Extreme Heat:** Rising heat waves leading to strokes and dehydration.
- ✿ **Vector Expansion:** Warmer climates habitat-boost Malaria and Dengue.
- ✿ **Mental Health:** Psychological stress due to climate-driven disasters.

"Climate change is the greatest global health threat of the 21st century."

The Tech Perspective (BCA)

- ✿ **IoT Sensors:** Real-time air/water quality monitoring systems.
- ✿ **E-Waste:** Toxic metals in hardware (Lead/Mercury) leaching into soil.
- ✿ **Data Science:** Predictive modeling for disease outbreaks.
- ✿ **Green Computing:** Reducing the carbon footprint of data centers.

| Sustainable Solutions

- ✿ **Afforestation:** Restoring green cover to filter air and soil.
- ✿ **Renewable Energy:** Transitioning to Solar and Wind power.
- ✿ **Waste Management:** Following the 3Rs (Reduce, Reuse, Recycle).
- ✿ **Policy Action:** Stricter industrial emission standards.

Thank You!
